Quality affordable housing is key to building a stronger Kentucky! Having a place to call home is the foundation for family success and a pillar—along with education, healthcare, and jobs—that allows our local communities to thrive.

For over 44 years, KHC has been investing in the creation, preservation, and sustainability of affordable housing. We finance home mortgages and develop affordable rental homes. We administer state and federal programs that assist low- and moderate-income households, homeless persons, and people in need of housing with supportive services. KHC also administers foreclosure prevention and weatherization programs to support sustainable homeownership.

In the coming year, we look forward to working with you to invest in affordable housing throughout the Commonwealth.

Thank you,

J. Kathryn Peters
Executive Director
