## Introduction

Kentucky's statewide Housing Policy Advisory Committee, in partnership with Kentucky Housing Corporation, has undertaken data collection and review related to the current state of housing throughout the Commonwealth. This document is a compilation of available data, presented in differing formats, to provide a concise look at many of the major factors affecting housing in general and affordable housing in particular.

The primary data collection methods included in this assessment are:

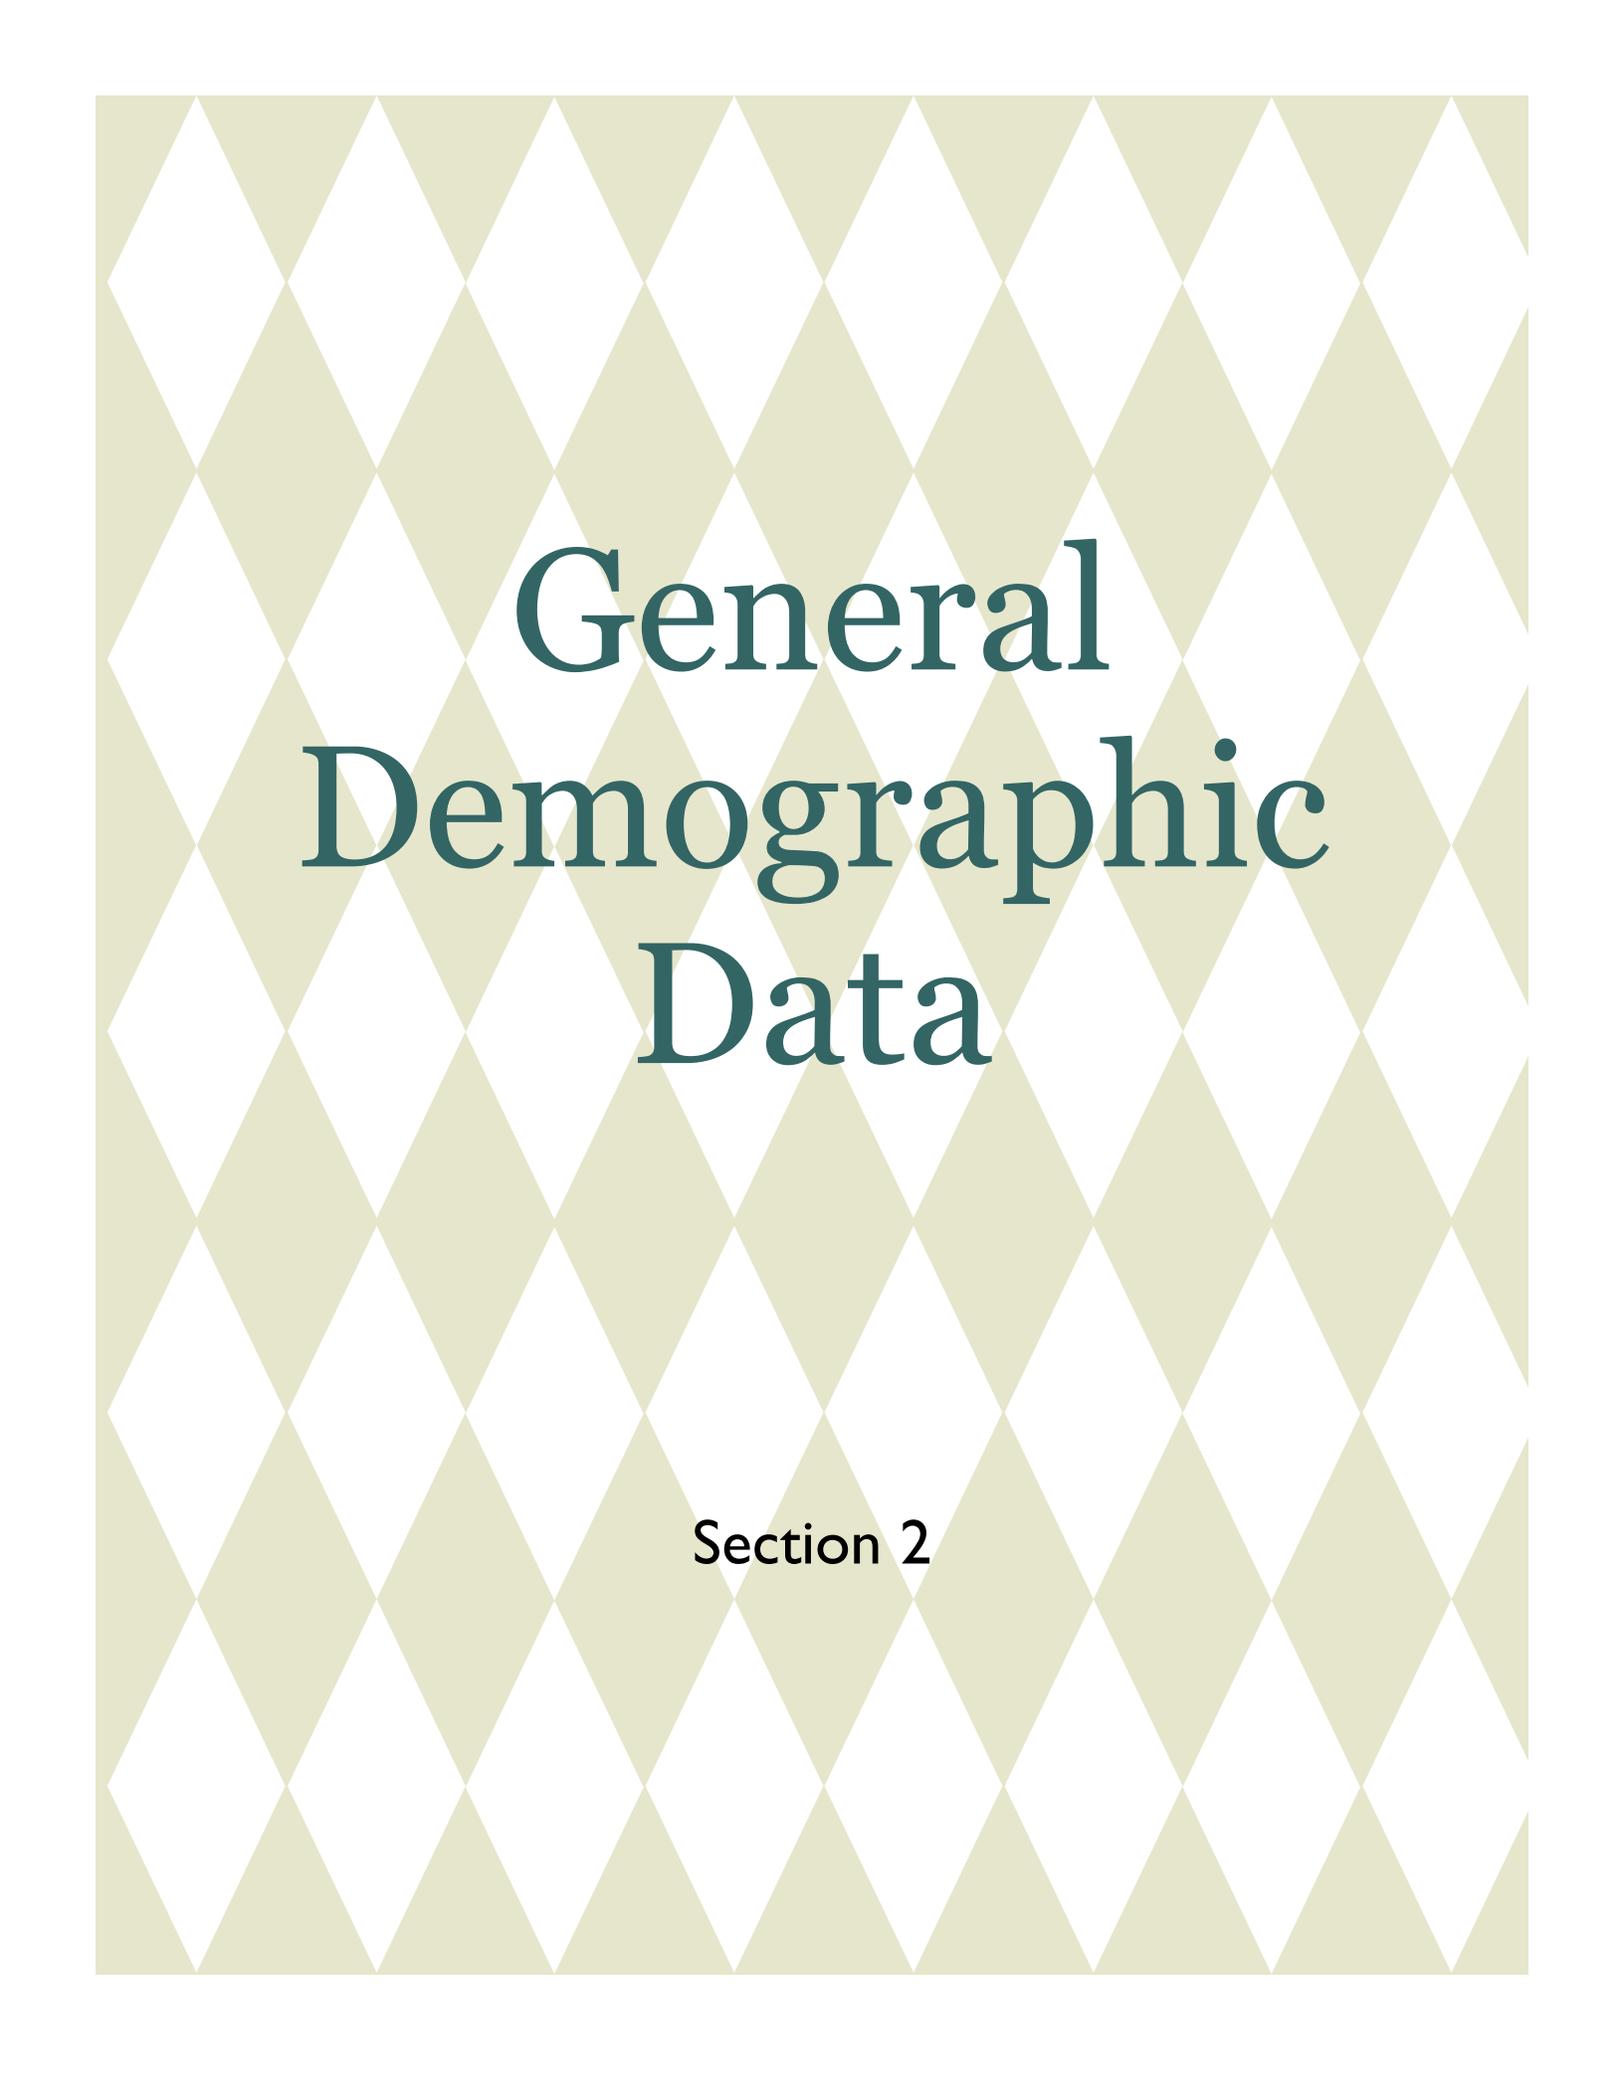

- Interviews and surveys undertaken with property administrators, program directors, and collaborative partners working in the housing industry in Kentucky;
- A review of relevant data and reports, to include, but not be limited to:
  - U.S. Census data
  - American Community Survey data estimates provided by the U.S. Census;
  - Housing data provided by Kentucky Housing Corporation and/or the U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC), and other entities;
  - Employment and economic data provided by the U.S. Bureau of Labor Statistics;
  - Data provided by state agencies and nonprofit organizations tasked with providing assistance to special needs populations.

While not a complete assessment of the current status of housing in Kentucky, the data provided in this document can be used to increase understanding of the following issues affecting allocation of scarce resources to assist low and moderate income persons in Kentucky to obtain and maintain safe, quality housing.

1. What are the housing market conditions in Kentucky both statewide and by county?
2. What housing is available in Kentucky, including affordable rental housing and owner-occupied housing?
3. Where would homeowner rehabilitation or demolition/reconstruction have the greatest impact? What is the need for new housing?
4. What are the greatest housing needs in each area of the state and what housing trends in the past ten years should be taken into consideration?
5. What are the population trends that will impact housing needs?
6. What are the trends affecting housing type, including renter-occupied and owner-occupied?
7. What are the trends in household composition?
8. What are the trends impacting homelessness, including special needs populations?
9. What economic impacts have affected Kentucky and its communities?
10. What industries are expanding and declining in Kentucky, and what areas of the state are most impacted?

All basic data requested is included with the exception of the following data which was not available:

- Condemnation data
- Recidivism Rates for Transitional and Permanent Supportive Housing
- Persons Exiting Prisons

Section 3

## **Housing Age Maps**

The following maps (3.1, 3.2, and 3.3) display the median age of housing units in Kentucky in 2000 and in 2010, as well as the inventory of housing units constructed pre-1989 as a percentage of all housing units by county.

Data sources: U.S. Census Bureau

## **Other Housing Unit Conditions**

Map 3.4 depicts mobile homes by county as a percentage of all housing units. The U.S. Census Bureau does not differentiate between mobile homes and manufactured homes nor does this data indicate the age of the structure.

Maps 3.5 and 3.6 depict homes by county that lack complete kitchen and bathroom facilities and/or have no heat source or utilize a source of heat fueled by wood, coal, coke, kerosene, or other similar fuels.

Data sources: U.S. Census Bureau

## **Living Area and Overcrowding**

Item 3.7 depicts a breakdown of housing units by county by the number of bedrooms in each unit.

Maps 3.8 and 3.9 depict overcrowded housing units as defined by the U.S. Census Bureau. Overcrowded housing units are those that contain more than one person to one and a half persons per room in the dwelling. Severely overcrowded housing units are those that contain more than one and a half persons per room in the dwelling. For this calculation, the U.S. Census Bureau does not differentiate between rooms in the housing unit and bedrooms in the housing unit, therefore, both types of data are included in this section.

# Rental Housing Data

Section 4

## **Assisted Rental Housing by Subsidy Type by County**

Item 4.1 is a detailed listing of the availability of housing choice vouchers and public housing by county as well as information on other subsidized rental housing projects by county. This data is limited to those projects listed on Kentucky Housing Corporation's assisted rental housing directory, and while it is a comprehensive list of available housing, it is not a complete list of all affordable housing in the state. This information is a combination of information provided by property owners, HUD and KHC's compliance monitoring data. For this project, KHC did not survey participating jurisdictions that have allocated local HOME Investment Partnerships Program (HOME) dollars, and those units do not appear on this list with the exception of a few projects that include KHC subsidies.

Notes:

Data sources include: KHC, HUD, and Rural Development. Data limitations are described below.

- Both KHC vouchers and those of other Public Housing Agencies in Kentucky; source of data is KHC and HUD.
- KHC Tenant-Based Housing Choice Vouchers that have been allocated to specific rental housing units.
- Project-based contracts between private owners and HUD.
- Rental units owned and managed by local housing authorities.
- 5, 6, 8. HUD subsidy to specific projects; source is HUD
- HOME Investment Partnerships Program funding (HOME). Data is limited to units funded with KHC HOME dollars for which KHC performs compliance monitoring. Data on HOME units funded by localities was not included unless KHC has allocated funding from other sources into the same project.
- Low Income Housing Tax Credit projects for which KHC continues compliance monitoring. Additional projects that are no longer in their allocation period, but remain in their affordability period may be included.
- USDA Rural Development Projects - data sources USDA Multifamily Housing Database.
- Tax Credit Exchange funding from the Trouble Asset Relief Program (TARP) and Tax Credit Assistance funding from the American Recovery and Relief Act (ARRA).
- Statewide Affordable Housing Trust Fund administered by KHC, includes projects that are still in their compliance monitoring period
- Other subsidy may include but is not limited to: KHC's SMAL Multifamily Program, Risk-Sharing, Mortgage Revenue Bonds, accepts Section 8, Supportive Housing, and other unspecified assistance.
- The total units that receive subsidy from more than one source is deducted from the total to arrive at a net number of assisted units per county.

## **National Low Income Housing Coalition Data**

Items 4.2 through 4.5 include data compiled by the National Low Income Housing Coalition (NLIHC) pertaining to gaps in the availability of affordable rental housing.

This information is presented in 4.2 as a table showing the total number of affordable housing units available for each 100 households.

Following this data is a breakdown by Congressional District.

Item 4.4 is the NLIHCs *Out of Reach 2011* report for Kentucky, which discusses wages needed to afford rental units at Fair Market Rents.

Item 4.5 is a map depicting the percentage of renters unable to afford the fair market rent for a two-bedroom housing unit.

Notes:

ELI - extremely low income; VLI - very low income; AMI - area median income; PUMA - Public Use Microdata Analysis from the U.S. Census American Community Survey. The first section of this analysis shows existing affordable rental units in the state and their affordability levels for households at different income levels. The second section of this analysis shows the gap in available units as compared to the number of households that need affordable housing, including that the gap exists for households that are extremely low and very low income with 35 units available per 100 households and 76 units available per 100 households respectively.

# Kentucky

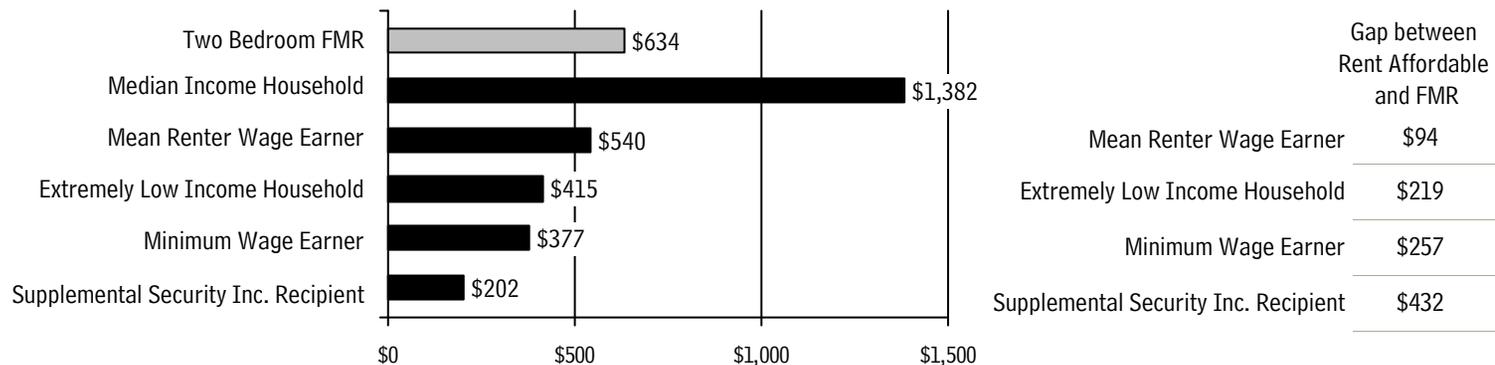

In Kentucky, the Fair Market Rent (FMR) for a two-bedroom apartment is \$634. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,112 monthly or \$25,340 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

**\$12.18**

In Kentucky, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 67 hours per week, 52 weeks per year. Or a household must include 1.7 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Kentucky, the estimated mean (average) wage for a renter is \$10.39. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 47 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

† Wage data not available (See Appendix A).

1: FMR = Fiscal Year 2011 Fair Market Rent (HUD, 2010). 2: AMI = Fiscal Year 2011 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs.

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

# Percent of Renters Unable to Afford Fair Market Rent for a Two Bedroom Unit

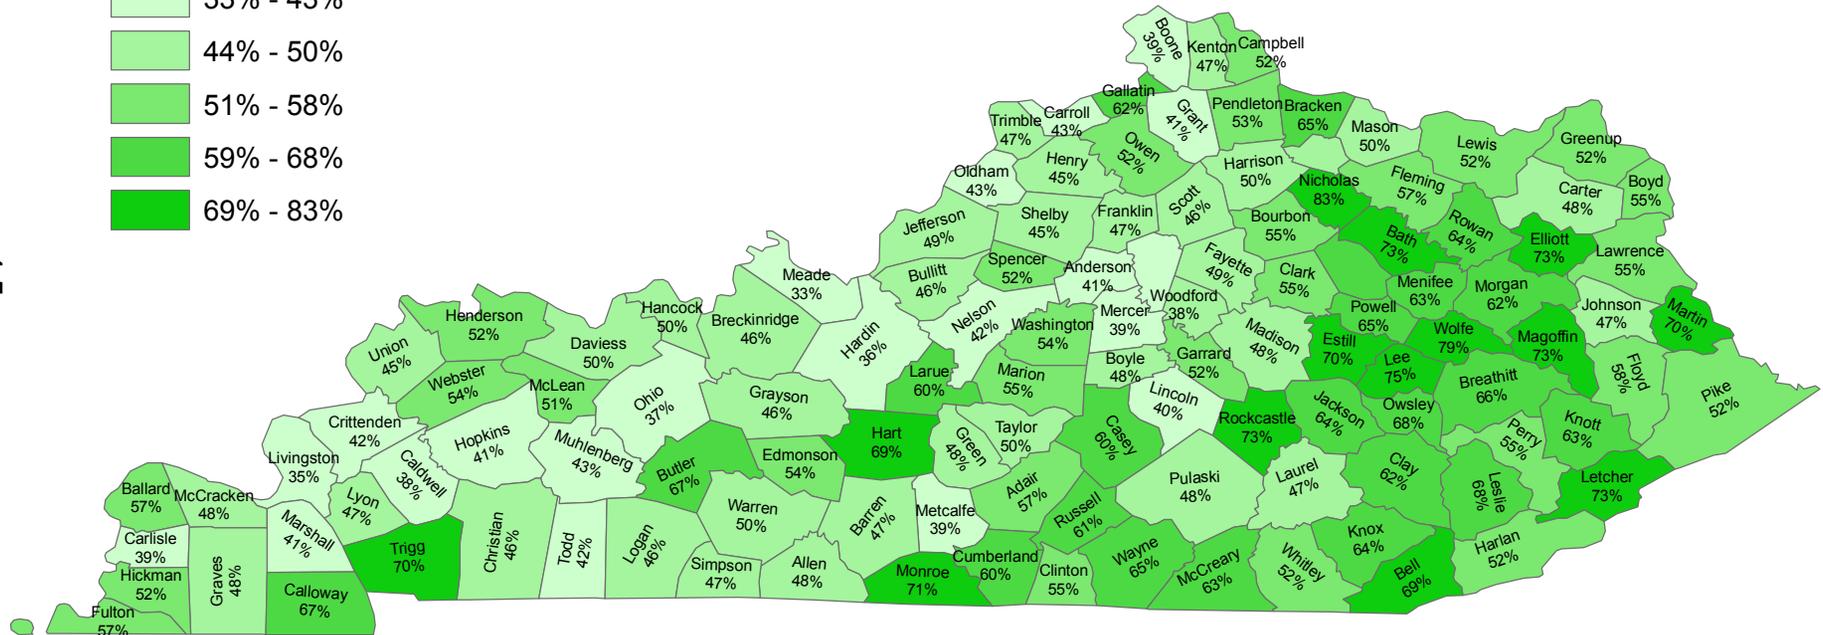

NLIHC Out of Reach 2011

## Legend

4.5

## **Renter Household Trends**

Items 4.6 through 4.8 are maps depicting percentage of renter households by county as a portion of all households. Data for 2000 and 2010 rates as well as the change from 2000 to 2010 is included.

## **Elderly and Disabled Units**

Item 4.9 is a map depicting the number of HUD-subsidized Section 202 and Section 811 rental units located in each county in Kentucky. The source of this data is KHC's Assisted Rental Housing Directory as updated using data available from HUD. This data does not include other subsidized projects that are specific to these populations.

## **Rental Vacancy Rates**

Items 4.10 through 4.12 are maps depicting the vacancy rate by county for rental units in 2000, 2010, and the change from 2000 to 2010.

## **2011 Calendar Year HQS Total Inspections Completed and Total Failed**

HUD requires Public Housing Authorities (PHAs) to perform an annual Housing Quality Standards (HQS) inspection on all rental housing units assisted with a Housing Choice Voucher prior to occupancy. The following tables, charts and map (4.13 through 4.15) reflect the **Total Completed HQS Inspections vs. Total Failed HQS Inspections** in calendar year 2011.

The table of **Most Common Reasons Units Fail HQS Inspections** is not listed in order of most common occurrence or most frequent. In addition, this list does not reflect all possible reasons a unit can fail an HQS Inspection.

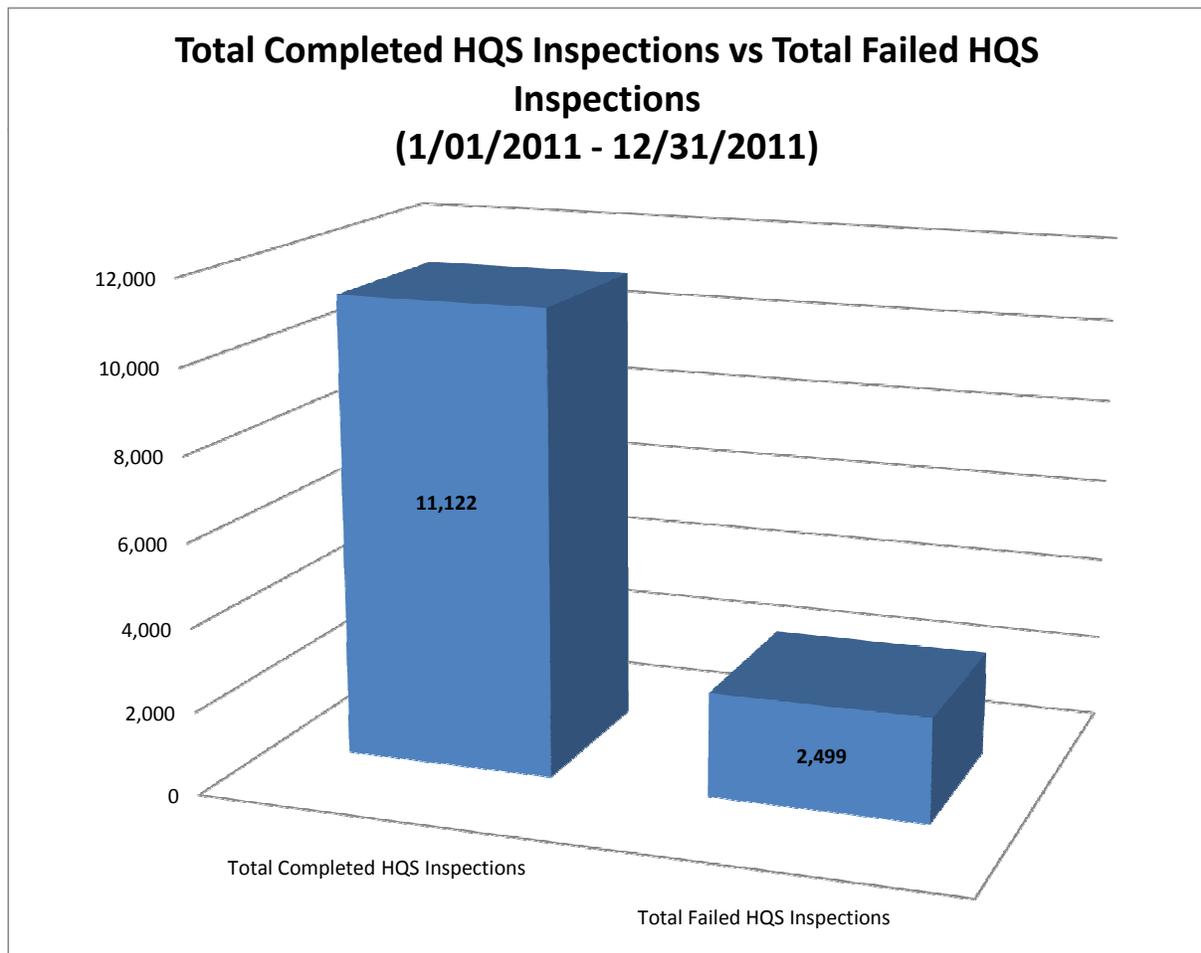

The **Total Completed HQS Inspections vs Total Failed HQS Inspections January 1, 2011 – December 31, 2011 by County** chart reflects the **Total Completed HQS Inspections** versus **Total Failed HQS Inspections** by county.

The **Housing Quality Standards (HQS) Inspection Failure Rate** map displays the HQS failure rate by county.

Total Completed HQS Inspections vs Total Failed HQS Inspections (1/01/2011 thru 12/31/2011)	
Total Completed HQS Inspections	11,122
Total Failed HQS Inspections	2,499
Percentage of Failed Inspections	20.7%

Most Common Reasons Units Fail HQS Inspections*
1. No smoke detectors within eight feet of each sleeping area and one on each level of the unit.
2. Lack of ventilation in bathroom (no window/fan).
3. Outlet covers missing or broken.
4. Windows broken and/or locks missing.
5. Infestation by bugs/vermin.
6. Absence of a handrail where there are four or more steps (risers) present.
7. Absent or insecure railings around a porch or balcony which is 30 inches or more above the ground.
8. Water heater discharge line is missing or too short; pop/relief valve is missing.
9. Utilities disconnected (must be connected).
10. Stove/refrigerator missing or inoperable and/or missing knobs, burners, or heating elements.
11. Tripping hazards as a result of floor covering.
12. Electrical hazards - Exposed electrical wiring.
13. Missing/broken globes on permanent light fixtures resulting in an electrical hazard.
14. Bedrooms must have a window. The window must open if it is designed to.
15. Windows which will not stay open (no props allowed).
16. Deadbolt locks utilizing a key to open from the inside are NOT allowed due to creating a fire exit hazard.
17. Water leaks on faucets/sinks/bathtubs/toilets.
18. Light bulbs missing on permanent light fixtures.

## **2011 Utility Allowances Methodology and Calculations**

Utility allowances are paid monthly by Kentucky Housing Corporation on behalf of the tenant in addition to rent as a part of the total Housing Assistance Payment. Below are the methodologies and calculations for the 2011 utility allowances.

### **Bottled Gas**

The Tenant-Based Rental Assistance Department gathers the rate of bottled gas per gallon from the U.S. Energy Information Administration Web Site.

*Calculation:* Dollars per gallon x Therms conversion (in gallons) x Bedroom factors

### **Oil**

The Tenant-Based Rental Assistance Department gathers the rate of oil per gallon from the US Energy Information Administration Web Site.

*Calculation:* Dollars per gallon x Consumption (in gallons) x Bedroom factors

### **Gas**

The Tenant-Based Rental Assistance Department gathers the rate of gas through contacting providers or using information from the Kentucky Public Service Commission.

*Calculation:* Dollars per gallon x Consumption (in Therms) x Bedroom factors

### **Electric**

The Tenant-Based Rental Assistance Department gathers the rate of electric through contacting providers or using information from the KY Public Service Commission.

*Calculation:* Dollars per gallon x consumption (in Kilowatt Hours) x Bedroom factors

### **Water /Sewer**

The Tenant-Based Rental Assistance Department gathers the water/sewer rates through contacting providers throughout the state.

*Calculation:* Dollars per gallon x consumption (in Gallons) x Bedroom factors

### **Trash**

The Tenant-Based Rental Assistance Department gathers the trash rates through contacting providers over the state.

*Calculation:* Cost per unit (per house)

Once utility allowance data are collected from the utility providers across the state the average is calculated for each type of utility and utility allowances are based on averages for the Central, Eastern, and Western Regions of Kentucky.

**Privacy Act Statement.** The Department of Housing and Urban Development (HUD) is authorized to collect the information required on this form by Section 8 of the U.S. Housing Act of 1937 (42 U.S.C. 1437f). Collection of family name and address is mandatory. The information is used to establish a utility allowance schedule for all utilities and other services used to determine the family's monthly housing assistance payment and family share. HUD will use this information to ensure that the costs are reasonable. HUD may disclose this information to Federal, State and local agencies when relevant to civil, criminal, or regulatory investigations and prosecutions. It will not be otherwise disclosed or released outside of HUD, except as permitted or required by law. Failure to provide any of the information may result in delay or rejection of Housing Assistance Payment contract.

This collection of information is authorized under Section 8 of the U.S. Housing Act of 1937 (42 U.S.C. 1437f). The information is used to establish a utility allowance schedule for all utilities and other services used to determine the family's monthly housing assistance payment and rental payment. HUD will use this information to ensure that the costs are reasonable.

## Instructions for Form HUD-52667, Allowances For Tenant Furnished Utilities and Other Services

Form HUD -52667 shall be completed by a HA for each different type of unit as explained below. Each form shall be reproduced by the HA and given to families with their Certificate or Voucher or subsequently in connection with any revisions. The form will provide the family, while shopping for a unit, with the amount of the allowances for various types of units for rent. With these allowances the family can compare gross rents and fair market rents. Form HUD-52667 shall also be used by the HA to record the actual allowance for each family.

**Level of Allowance:** Utilities and other services are included in gross rent, and when they are not furnished by the owner, an allowance must be provided to the family. Allowances must be adequate for all utilities and services not provided by the owner that were included in the fair market rent. The utility allowance schedule is based **on the typical cost of utilities and services paid by energy-conservative households that occupy housing of similar size and type in the same locality.** In developing the schedule, the HA must use normal patterns of consumption for the community as a whole and current utility rates. Allowances must not be based on energy consumption or costs above average or below average income families. The objective shall be to establish allowances based on actual rates and average consumption estimates and should allow the majority of participating families an allowance that is adequate to cover expected average utility costs and other services over a 12-month period.

### Determining Allowances:

- a. In general, HAs shall use to the extent possible local sources of information on the cost of utilities and services. The following local sources should be contacted:
  - (1) Electric utility suppliers.
  - (2) Natural gas utility suppliers.
  - (3) Water and sewer suppliers.
  - (4) Fuel oil and bottle gas suppliers.
  - (5) Public service commissions.
  - (6) Real estate and property management firms.
  - (7) State and local agencies.
  - (8) Appliance sales or leasing firms.

- b. Recently adopted utility allowance schedules from neighboring HAs with essentially the same type of housing stock should also be examined. In most cases fuel or utilities rates normally will not vary appreciably in neighboring communities and where data is not available in small communities' allowances for larger nearby communities may be used. Where local sources are inadequate, the HA may consult the national average consumption data provided in Table 1 and make appropriate adjustments to reflect local conditions.
- c. The HA must establish separate heating and cooling allowances for the various types of existing housing in the locality with the same number of bedrooms. Depending on local housing stock, utility allowances must be established for the following unit types: detached houses, duplexes, row or townhouses, garden and high rise apartments and manufactured homes. In addition to establishing different heating and cooling allowances for various types of structures, attention should be given to different allowances for water depending on whether families will have responsibilities for lawn care.
- d. The data to be solicited from the local sources shown above should be as close as possible in form and detail to the format of form HUD -52667. If possible, all consumption data should be obtained for each unit size and type. If data is available only for an average unit size (2.5 bedrooms), multiply the utilities costs for the average unit by the following factors:

<u>Size of Unit</u>	<u>Factor</u>
0-BR	0.5
1-BR	0.7
2-BR	0.9
3-BR	1.1
4-BR	1.4
5-BR	1.6

Example: Natural gas heating cost for average sized unit is \$18.00 per month. The allowance for a 4-bedroom unit will be  $1.4 \times \$18.00 = \$25.00$  (rounded to nearest dollar).

**Air Conditioning:** Allowances for air conditioning must be established only for communities where the majority of units in the market provide centrally air conditioned units or appropriate wiring for tenant installed A/C units.

**Ranges and Refrigerators:** Allowances for ranges and refrigerators must be based on the lesser of the cost of leasing or installment purchasing of suitable equipment.

**Utility Rate Schedules:** The cost of gas and electricity varies according to amounts consumed as shown on the appropriate rate schedules. It is not possible to compute exactly the cost of electricity for any given function without knowing the total electrical usage for a unit. However, because neither the HA or the families know beforehand just what will be the combination of utilities for any unit rented, it will be necessary to approximate the allowances for each function (e.g., heating cooking, etc.) as follows:

For electricity the rates used for lighting, refrigeration and appliances (Table 1, Item I), should be from the top of the rate schedule or the higher unit costs. Allowances for electric cooking, water heating and space heating should be computed from the middle or lower steps in the rate schedules.

Similarly, allowances for gas used for water heating and cooking should be computed using rates from the top of the rate schedule and for heating from the lower steps.

**Supporting Documentation:** The HA shall maintain with the form HUD-52667 copies of all supporting documentation used in determining the allowances and any revisions. For instance, letters from local utility companies shall be attached plus any worksheets used by the HA in computing allowances. The material should contain, if possible, the quantities of the utilities that are the basis of the dollar allowances (e.g., kilowatt hours per unit. A copy of the utility allowance schedule must be sent to the HUD Field Office.

**Table 1**  
**Average Allowances For Tenant Purchased Utilities**

Note: The consumption amounts listed below are inexact averages and must be used with caution when establishing allowances for actual projects.

- (a) Estimated average consumption for a hypothetical 2 1/2 bedroom dwelling unit. All consumptions listed must be adjusted for the size of the dwelling unit. Factors shown under Determining Allowances, subparagraph d, may be used for making the adjustment.
- (b) Consumptions will vary considerably depending on electrical appliances used. Upper limits should be sufficient to provide 85 kilowatt hours for a clothes dryer and 50 kilowatt hours for a frost free refrigerator.
- (c) The temperature of local water supply varies by geographic area and will have considerable impact on energy used to heat domestic water. This estimate is for Northern Central geographic areas where the average city water temperature is approximately 50° F.
- (d) Consumptions are for housing insulated for the heating system installed. Normally a building designed for electric space heating is better insulated than one designed for gas or oil space heating equipment. Climatic conditions assumed to be 4,000 heating degree days and 0° F outside design temperature. Consumption must be adjusted for the normal heating degree days and the outside design temperature in the given geographic area.
- (e) Consumption estimated for 1,000 degree days cooling. Actual consumption will depend on many variables.

**Note:** The consumption amounts listed above are inexact averages and must be used with caution when establishing allowances for actual projects.

## **2009 to 2012 Utility Allowance Charts**

Following are detailed utility allowance charts utilized by Kentucky Housing Corporation when calculating utility costs for each Tenant-Based Rental Assistance subsidized housing unit. Although KHC utilizes updated charts each year, the following charts are a compilation of costs over time by region.

Following each region's combined chart is a line graph displaying the change in cost over time for selected heating methods for a three-bedroom rental unit.

Also included is a chart and graph comparing the cost to heat a three bedroom unit by region.

## **2011 Fair Market Rents and Payment Standards**

The fair market rents (FMR) are published annually by HUD. Regulations require that PHAs update their payment standards (PS) annually, as well by setting their PS at 90 to 110 percent of the FMR. Any amount outside these parameters must be approved by HUD.

Kentucky Housing Corporation routinely sets the PS at 110 percent of the published FMRs. While this practice uses the higher limit, the gross rent (contract rent and utilities) of any program unit must undergo a rent comparability test. This test ensures that regardless of the allowable gross rent per the PS, the rent for the unit is comparable to similar unassisted units in the same area.

\* Reflects Kentucky Housing Corporation's 2010 Payment Standards which are effective January 2011. Also, please note all PS are set at 110% of FMRs with the exception of Daviess County.

\* (X) denotes counties in which Kentucky Housing Corporation does not administer voucher, thus there are no PS reflected for these counties.

\*Highlighted cells denote a decrease in PS.

## **Housing Cost Burdened Renter Households**

Items 4.28 and 4.29 are maps depicting the percentage of renter households that are housing cost burdened.

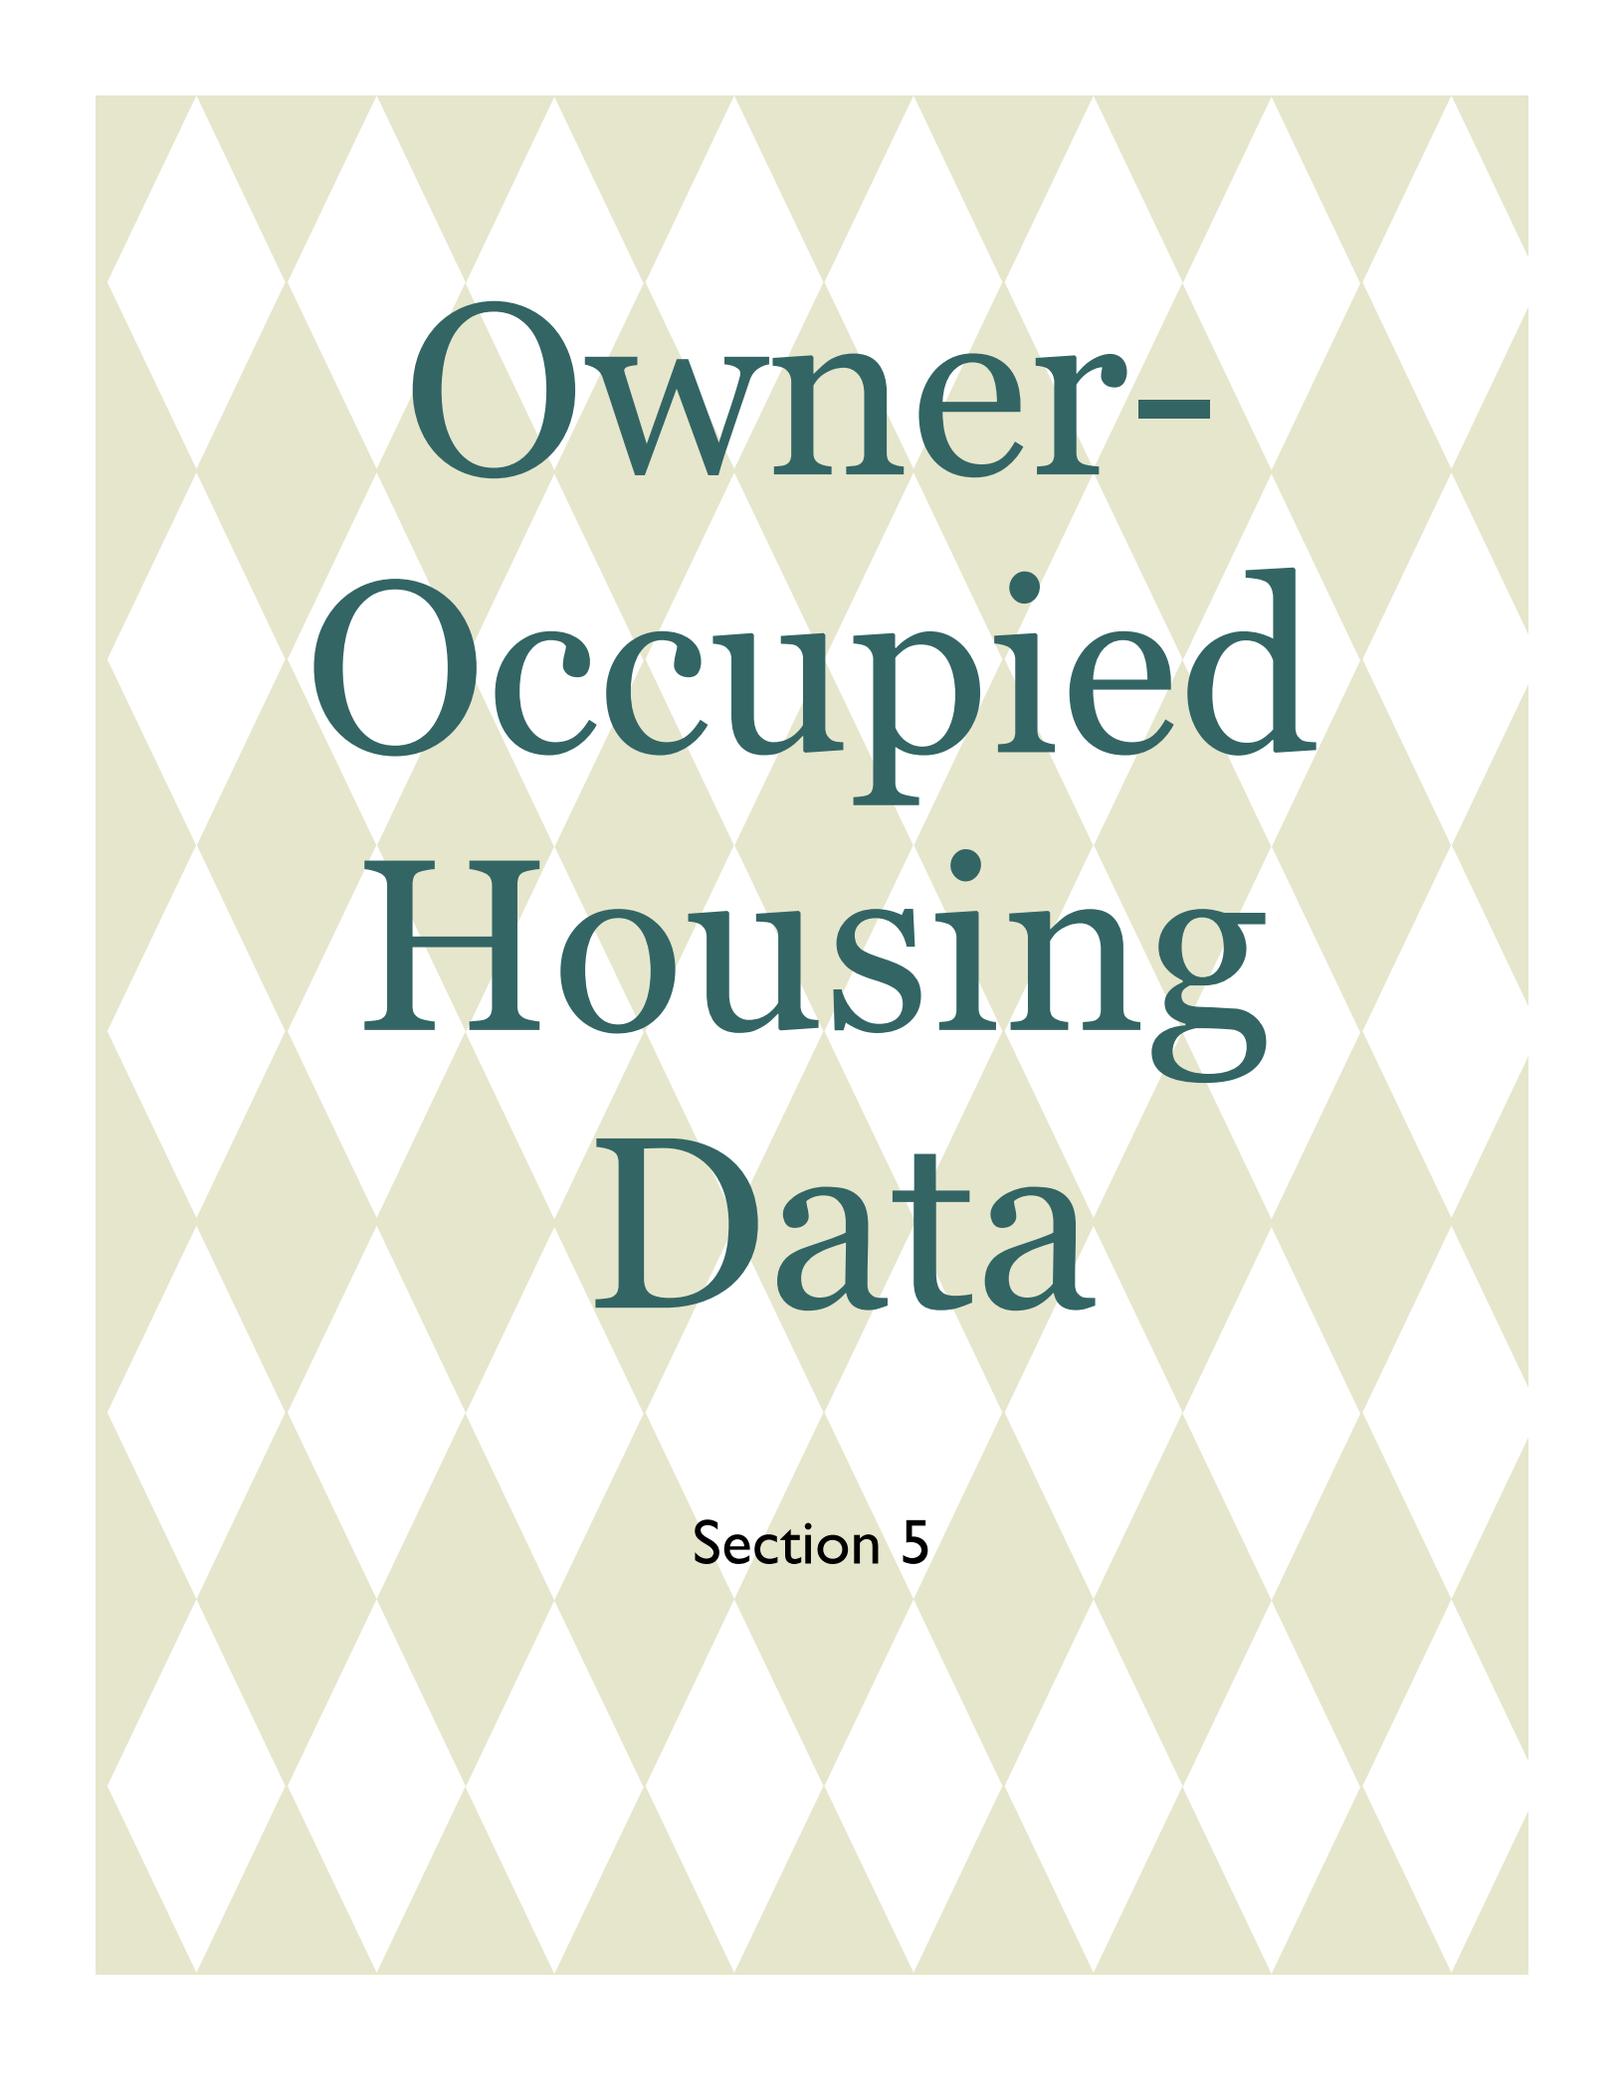

Housing cost burdened households pay from 30 to 34.99 percent of monthly income for housing costs.

Extremely housing cost burdened households pay 35 percent and above of monthly income for housing costs.

# Owner- Occupied Housing Data

Section 5

## **Homeownership Rate**

Items 5.1 through 5.3 are maps depicting the percentage of households that are owner-occupied. Data includes the homeownership rate by county in 2000 and again in 2010. Also included is a map depicting the change in rate by county.

## **Owner-Occupied Housing Mortgage Status and Housing Costs**

Items 5.5 through 5.7 are maps depicting the percentage of owner-occupied housing units encumbered by at least one mortgage lien and the owners who are housing cost-burdened and severely housing cost-burdened.

Owners who pay between 30 and 34.99 percent of monthly income for housing costs are considered housing cost-burdened.

Owners who pay 35 percent or more of monthly income for housing costs are considered severely housing cost-burdened.

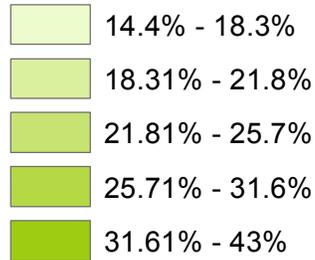

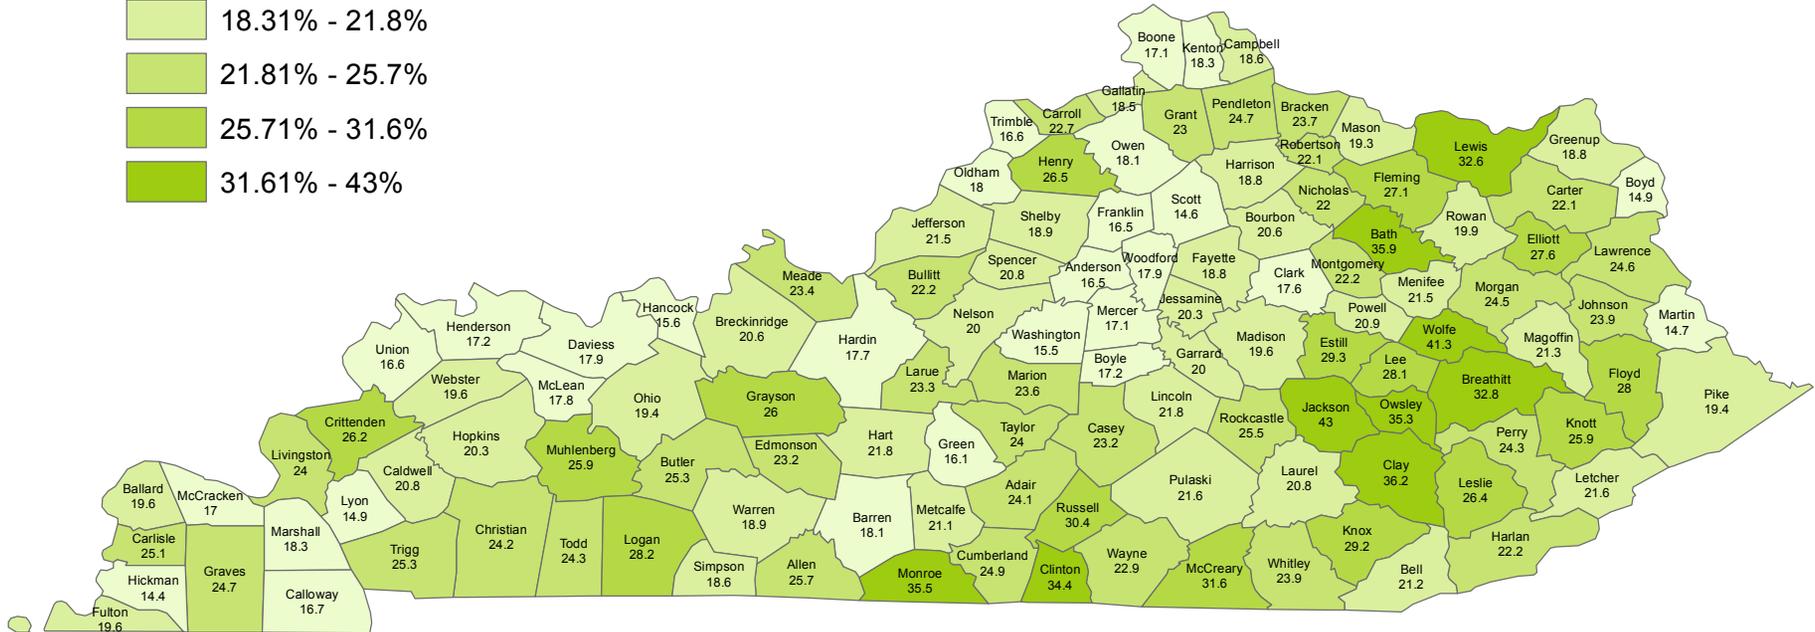

# Severely Cost-Burdened Owner-Occupied Housing Units Paying 35% or More of Monthly Income for Housing Costs

## **Point-In-Time Counts of People Who are Homeless in the State of Kentucky**

Item 6.1 includes numerous graphs and charts detailing data from the state's annual point-in-time homeless count from 2009 through 2011. HUD requires Continuum of Care (CoC) regions to undertake this count annually. The data is specific to the date the count is made and is not indicative of persons served annually.

The **Point-In-Time Counts of People Who Are Homeless - CoC: KY-500 Kentucky Balance of State Continuum of Care** charts and graphs depict sheltered, unsheltered, and total households and persons in the Balance of State for 2009 thru 2011.

It is important to note that the Balance of State Continuum of Care reflects all counties with the exception of Fayette and Jefferson Counties.

The **PIT Subpopulations - CoC: KY-500 Kentucky Balance of State Continuum of Care** chart and graph depict the subpopulation types for people who are homeless in the Balance of State for 2009 thru 2011. The subpopulation types are determined and established by HUD.

The **2009-2011 Households and Individuals by Household Composition** chart and graph includes data for the number of households and persons by household composition from 2009 thru 2011.

It is important to note that this data is for the Balance of State Continuum of Care. The Balance of State Continuum of Care reflects all counties with the exception of Fayette and Jefferson Counties.

The **2009-2011 Individuals in Transitional Housing** chart and graph includes data for the number of households and individuals in transitional housing units from 2009 thru 2011.

## **Precariously Housed Individuals in the State of Kentucky**

The **2009-2011 Precariously Housed Individuals** chart and graph includes data for the number of individuals that are precariously housed from 2009 thru 2011.

It is important to note that this data is for the Balance of State Continuum of Care. The Balance of State Continuum of Care reflects all counties with the exception of Fayette and Jefferson Counties.

Also note that all data reflected in the **2009-2011 Precariously Housed Individuals** has been collected thru the Point-In-Time Count for 2009 thru 2011.

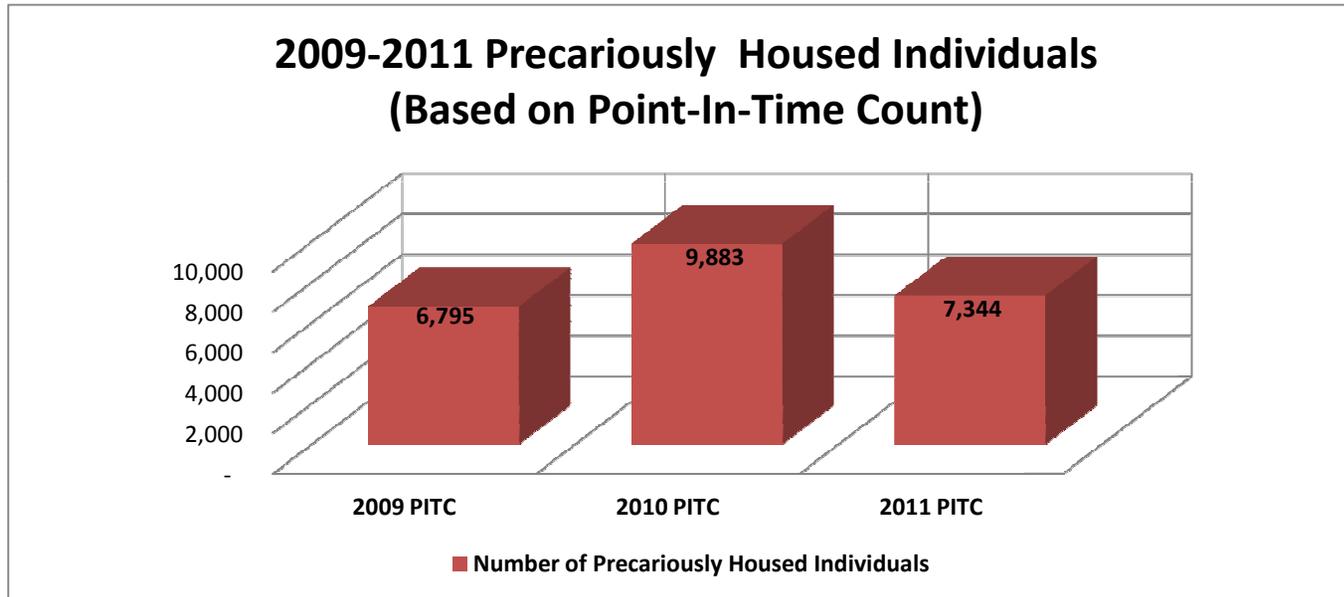

Precariously housed individuals are in danger of becoming literally homeless because they have no place of their own to live or their current housing situation is tenuous. This group includes, among others, people who are doubled up - those who are living for short periods of time with friends or relatives and thus lack a fixed, regular nighttime residence.

	2009 PITC	2010 PITC	2011 PITC
Number of Precariously Housed Individuals	6,795	9,883	7,344

Precariously housed individuals are based on 2009 through 2011 Point-In-Time Homeless Counts. The Balance of State Continuum of Care includes all counties except Fayette and Jefferson Counties. Precariously housed individuals are in danger of becoming literally homeless because they have no place of their own to live or their current housing situation is tenuous. This group includes, among others, people who are doubled up - those who are living for short periods of time with friends or relatives and thus lack a fixed, regular nighttime residence.

HUD does not consider precariously housed individuals to be homeless according to the definition of homeless in the Stewart B. McKinney Homeless Assistance Act of 1987.

### Description of Analysis for Report: CMHC\_I7 - All Clients by Program (Including Dual Diagnoses)

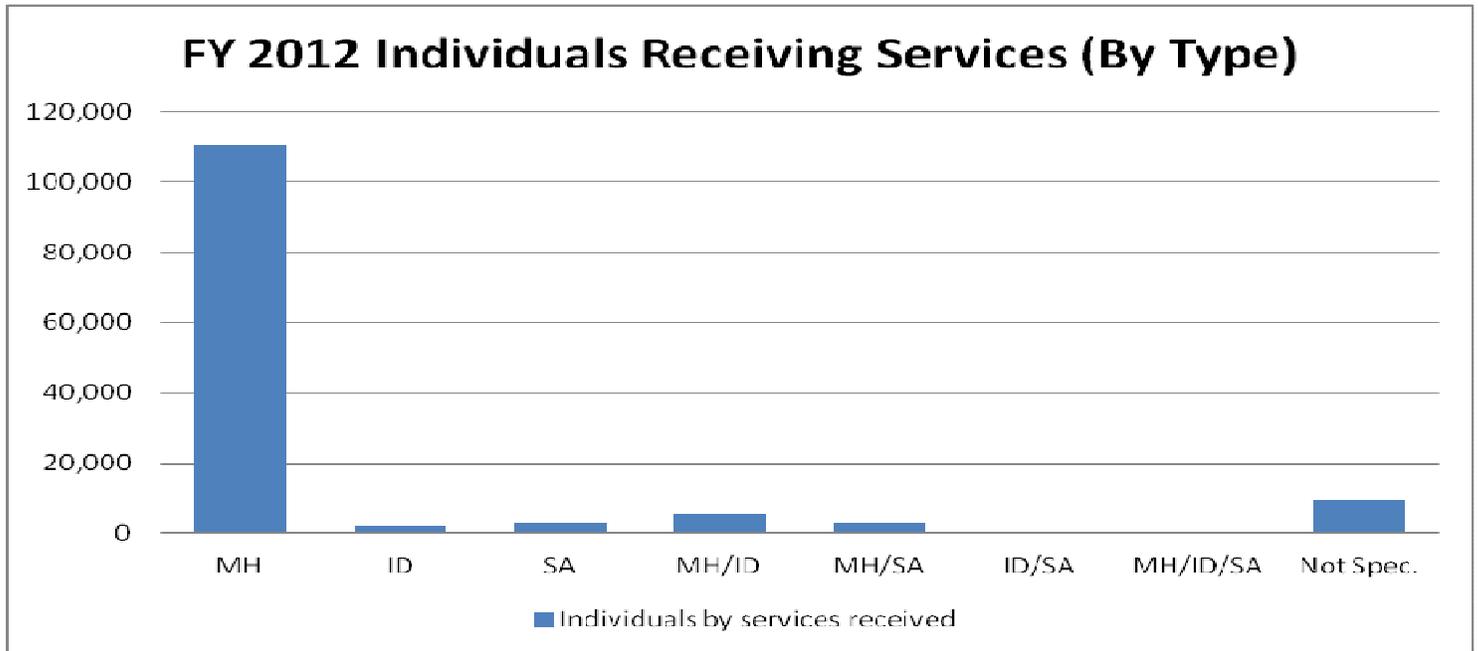

Rpt ID: CMHC-I7

Report Date: 2/17/2012

Does not include any region not served by one of the 14 Regional Boards. Clients reported are those who received at least one service during the fiscal year as reported in the Event Data Set. The program area (MH, ID, SA) is determined using the Data Dictionary definition for each program for the last Client record for the year. For all diagnoses which do not fall into one of the three program areas, the program is "Not Spec."

NOTE: This report shows a distinct count of clients. Clients are not reported in more than one program.

**Statewide Youth Aging Out of Home Care (as of February 26, 2012)**

As of the report provided on February 26, 2012, there is an estimated 554 youth statewide in Out of Home Care branch of the Cabinet for Health and Family Services who are between the ages of 18 and 21. Youth in Out of Home Care are a liquid population and on any given day youth may enter or exit state's care. At any point after turning 18 in state's care, youth may leave for various reasons and could possibly be eligible for Chafee Room and Board services at that time.

Below is the number of youth statewide who are aging out of foster care by region

<b>Out of Home Care Branch Region</b>	<b>Number of Youth In Region</b>
<b><u>Eastern Mountain</u></b> (Floyd, Johnson, Magoffin, Martin, Pike, Breathitt, Lee, Knott, Leslie, Letcher, Owsley, Perry and Wolfe)	<b>29</b>
<b><u>Jefferson</u></b> (Jefferson county)	<b>82</b>
<b><u>Northeastern</u></b> (Bath, Bracken, Fleming, Lewis, Mason, Menifee, Montgomery, Morgan, Robertson, Rowan, Boyd, Carter, Elliott, Greenup and Lawrence)	<b>40</b>
<b><u>Northern Bluegrass</u></b> (Bath, Bracken, Fleming, Lewis, Mason, Menifee, Montgomery, Morgan, Robertson, Rowan, Boyd, Carter, Elliott, Greenup and Lawrence)	<b>81</b>
<b><u>Salt River Trail</u></b> Breckenridge, Grayson, Hardin, Larue, Marion, Meade, Nelson, Washington, Anderson, Bullitt, Franklin, Henry, Oldham, Shelby, Spencer, Trimble and Woodford	<b>64</b>
<b><u>Southern Bluegrass</u></b> (Boyle, Clark, Estill, Fayette, Garrard, Jessamine, Lincoln, Madison, Mercer and Powell)	<b>100</b>
<b><u>The Cumberland's</u></b> (Bell, Clay, Hardin, Jackson, Laurel, Knox, Rockcastle, Whitley, Adair, Casey, Clinton, Cumberland, Green, McCreary, Pulaski, Russell, Taylor and Wayne)	<b>36</b>
<b><u>The Lakes</u></b> (Caldwell, Christian, Crittenden, Hopkins, Livingston, Lyon, Muhlenberg, Todd, Trigg, Ballard, Calloway, Carlisle, Fulton, Graves, Hickman, Marshall and McCracken)	<b>58</b>
<b><u>Two Rivers</u></b> (Allen, Barren, Butler, Edmonson, Hart, Logan, Metcalfe, Monroe, Simpson, Warren, Daviess, Hancock, McLean, Ohio, Henderson, Union and Webster)	<b>6</b>

## **Recovery Kentucky**

Items 6.17 and 6.18 include information on the location of Recovery Kentucky Centers and the number of admissions by center from January 1, 2009 through December 31, 2011. Clients already in the program (prior to 2009) were not calculated in the admissions totals, but are shown in the completion, discharge, and termination totals.

Reasons for leaving a center include: discharges due to completion of program, incarcerations, transfers, terminations, left on their own accord (also referred to as left against professional advice), and other reasons. Other reasons for leaving included in the last description include: medical, mental illness, voted out by the community of their peers, other charges to be addressed, drug court or other judicial withdrawals from the centers to return clients to their jurisdiction or complete sentencing requirements, facility terminations (most are listed under Terminations, but some were listed as “other” and the description showed facility terminations), inappropriate behaviors, manipulation of the system, theft on the property, vandalism, acts of violence, and just walking away from the facility without notice. Clients that restart the program, many doing so several times, are included in these totals.

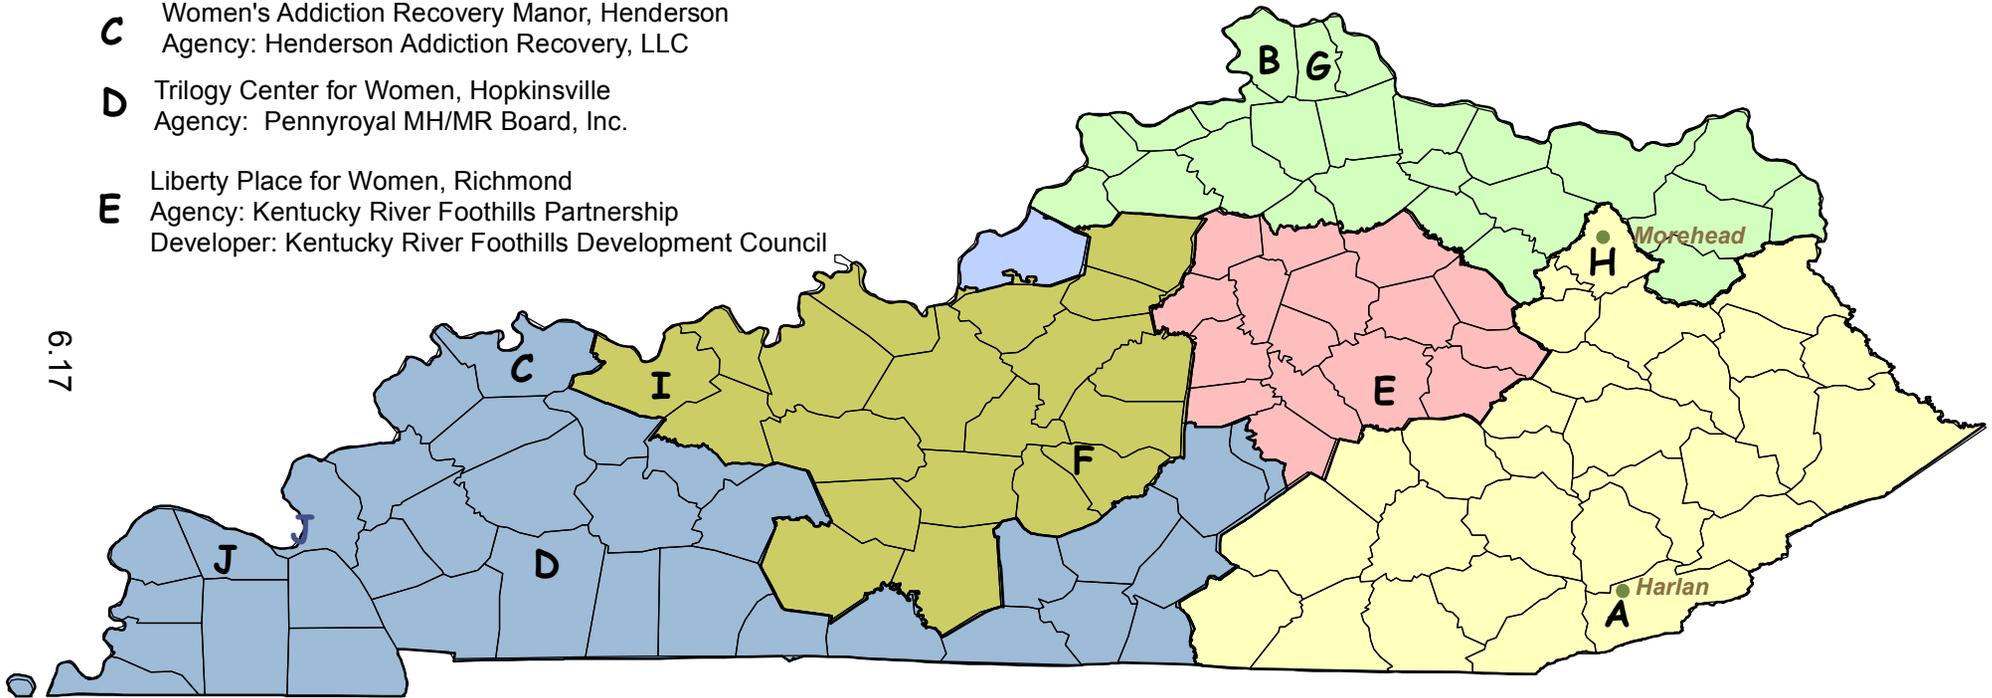

Additional data for Recovery Kentucky is available upon request.

## **New and Expanding Industries Report**

### **Introduction and Methodology**

The Kentucky new and expanding industries reports provide a measure of economic development based on qualified industrial activity in the Commonwealth announced or reported during the year. The reports are compiled from data provided by companies, local and industrial development contacts, newspaper announcements, and Cabinet programs designed to locate and retain industry.

The reports include estimated number of jobs, estimated capital investments, and product/service descriptions. Activities are reported in the year the announcements are made, even though full employment announced may not be realized until future years. Kentucky Reinvestment Act (Jobs Saved column) have been calculated into the report beginning with projects announced after July 1, 2009.

If investment or employment exceeds the original announced figures, the additional investment or jobs are included as an expansion in a later report. If actual employment figures are less than those reported, future employment expansion are not reported until after the projected figure has been reached. Efforts are made to eliminate duplications and overestimates of jobs and investments.

New industries are defined as companies locating in a Kentucky community for the first time, companies locating an additional facility in a community with new product line, or the reopening of a facility after an announced permanent shutdown of operations. Expansions are defined as companies increasing employment, capital investment or square footage to physical facilities. Replacement of machinery is included only if it results in greater productivity or product improvement. Expansions announced after January 1, 2003, are included only if they are expected to increase employment or involve at least \$100,000 in investment. As of January 2009, the Investment figure includes (when applicable) rental/lease costs associated with a project. Prior to this, the figure is limited to capital investment. Announced locations/expansions are removed from the report if it is known that the location will not or the expansion did not take place.

The supportive industry section includes new and expanding warehouses, packaging and distribution facilities, corporate headquarters, and services.

## **New and Expanding Industries Report**

### **Introduction and Methodology**

The Kentucky new and expanding industries reports provide a measure of economic development based on qualified industrial activity in the Commonwealth announced or reported during the year. The reports are compiled from data provided by companies, local and industrial development contacts, newspaper announcements, and Cabinet programs designed to locate and retain industry.

The reports include estimated number of jobs, estimated capital investments, and product/service descriptions. Activities are reported in the year the announcements are made, even though full employment announced may not be realized until future years. Kentucky Reinvestment Act (Jobs Saved column) have been calculated into the report beginning with projects announced after July 1, 2009.

If investment or employment exceeds the original announced figures, the additional investment or jobs are included as an expansion in a later report. If actual employment figures are less than those reported, future employment expansion are not reported until after the projected figure has been reached. Efforts are made to eliminate duplications and overestimates of jobs and investments.

New industries are defined as companies locating in a Kentucky community for the first time, companies locating an additional facility in a community with new product line, or the reopening of a facility after an announced permanent shutdown of operations. Expansions are defined as companies increasing employment, capital investment or square footage to physical facilities. Replacement of machinery is included only if it results in greater productivity or product improvement. Expansions announced after January 1, 2003, are included only if they are expected to increase employment or involve at least \$100,000 in investment. As of January 2009, the Investment figure includes (when applicable) rental/lease costs associated with a project. Prior to this, the figure is limited to capital investment. Announced locations/expansions are removed from the report if it is known that the location will not or the expansion did not take place.

The supportive industry section includes new and expanding warehouses, packaging and distribution facilities, corporate headquarters, and services.

## Housing Needs Survey Open Response Questions

Approximately 400 open-ended question responses to the online surveys were received and are summarized as follows:

### Project-Based Rental Assistance Housing Needs Survey

1. Describe general housing need in your area:
  - The need for decent and affordable single family and multifamily rental units.
    - “Lack of affordable housing that is clean and in a safe neighborhood.”
  - The need for senior/elderly housing
    - “Senior housing with light services for the aging.”
2. Describe any gaps in current services.
  - The availability of Section 8 Housing Choice Vouchers
    - “The availability of Section 8 housing has caused hardships for families.”
    - a. Transportation to services
      - “Transportation for seniors”

### Homeownership Housing Needs Survey

1. Describe general housing need in your area:
  - Affordable homes for less than \$120,000 in value
    - “There is a need for good housing in the \$75,000 to \$100,000 price range. Most properties available in this price range require significant updates/repairs and typically will not appraise well and often have many home inspection concerns.”
    - “Houses that are less than \$100,000 in value”
    - “Homes with prices from 80,000 to 120,000”
  - Less stringent credit and refinance requirements for borrowers
    - “Buyers are having trouble getting loans. Over the last 5 years. The lenders have gone from being too easy to too Hard to get Buyers Qualified.”
    - “Foreclosures high. Values dropping. Limits refinance possibilities for borrowers”

2. Describe any gaps in current services:

- Homeownership loan requirements are too stringent
  - “Lending - loans are obtainable and available to homebuyers who have worked to improve their credit but are not "perfect" yet.”
  - “Loan qualifications are so stringent now that people who can afford the home can't get a loan.”
  - “credit scores under 640”
- Availability of rehabilitation funds
  - “Rehabilitation funds not available”

Specialized Housing Resources Housing Needs Survey

1. Describe general housing need in your area:

- Affordable and emergency housing for families
  - “The primary need is for emergency and long-term housing for FAMILIES that include men. For example, Salvation Army turns away fathers and sons over the age of 12. They also turn away families with same-sex parents.”
- Shorter waiting list
  - “There are over 11,000 homeless individuals in the city; the waiting list for Section 8 housing is over 22,000 people long. Though Louisville is an affordable city to live in, affordable housing options are lacking.”
- Housing assistance for criminals
  - “We have several agencies who work with drug addicts and alcoholics. Housing for early intervention in addiction remains a problem. With the changes in the laws with House Bill 463, many prisoners are being released back to the community and are asked to find a recovery or treatment program. Bed space is filled to maximum and hard to find. When left out for any length of time we lose the opportunity to help the individual when they are ready for the help. The wait sometimes changes their mind on recovery. They go back to the same living situation and the cycle of criminal activity and drug use begins again for them.”

- Need greater amount of income-based housing
  - “We need more housing that is based on your income. More housing that is actually kept up and taken care of for the people on a low or fixed income.”

2. Describe any gaps in current services:

- Lack of services available for mental health
  - “Moving from hospital/mental institution facilities into permanent housing instead of homelessness.”

### Tenant Based Rental Assistance Housing Needs Survey

1. Describe general housing need in your area:

- Large housing inventory not selling
  - “Too many houses available for sell”
  - “Lots of houses for sale but inventory is not selling”
  - “We have plenty of new apartment units being built but there seems to be a need for single family rental homes.”
  - “Too many units available”

2. Describe any gaps in current services:

- Affordable housing for specialized populations
  - “There is not enough quality housing for seniors.”
  - “More handicap accessible rental units.”

### Housing Production Housing Needs Survey

1. Describe general housing need in your area:

- Lack of Affordable Housing
  - “There is a lack of adequate housing. Many families pay high rent for homes that are not safe or meet basic needs.”
- Rehab programs for existing units and vacant properties
  - “Rehabilitation of existing rental units.”
  - “Assistance with the Government’s inability to get rid of vacant properties and to be able to release them to an organization that can make a

difference in the home/neighborhood. We need to concentrate on re-building our communities statewide.”

- Lack of Affordable Housing
  - “Funding for affordable rental housing is much needed; this part of the state doesn’t appear to receive as much funding.”
  - “Overall lack of affordable units”

2. Describe any gaps in current services:

- Need of transportation services
  - “Transportation services for elderly and/or handicapped families is needed”
- Housing Needs for deaf population
  - “There is a critical need to establish housing units for the deaf and hard of hearing consumers so that they would be given a chance to communicate their needs to the housing management team in the long run.”

## 2012 Housing Needs Telephone Survey Results

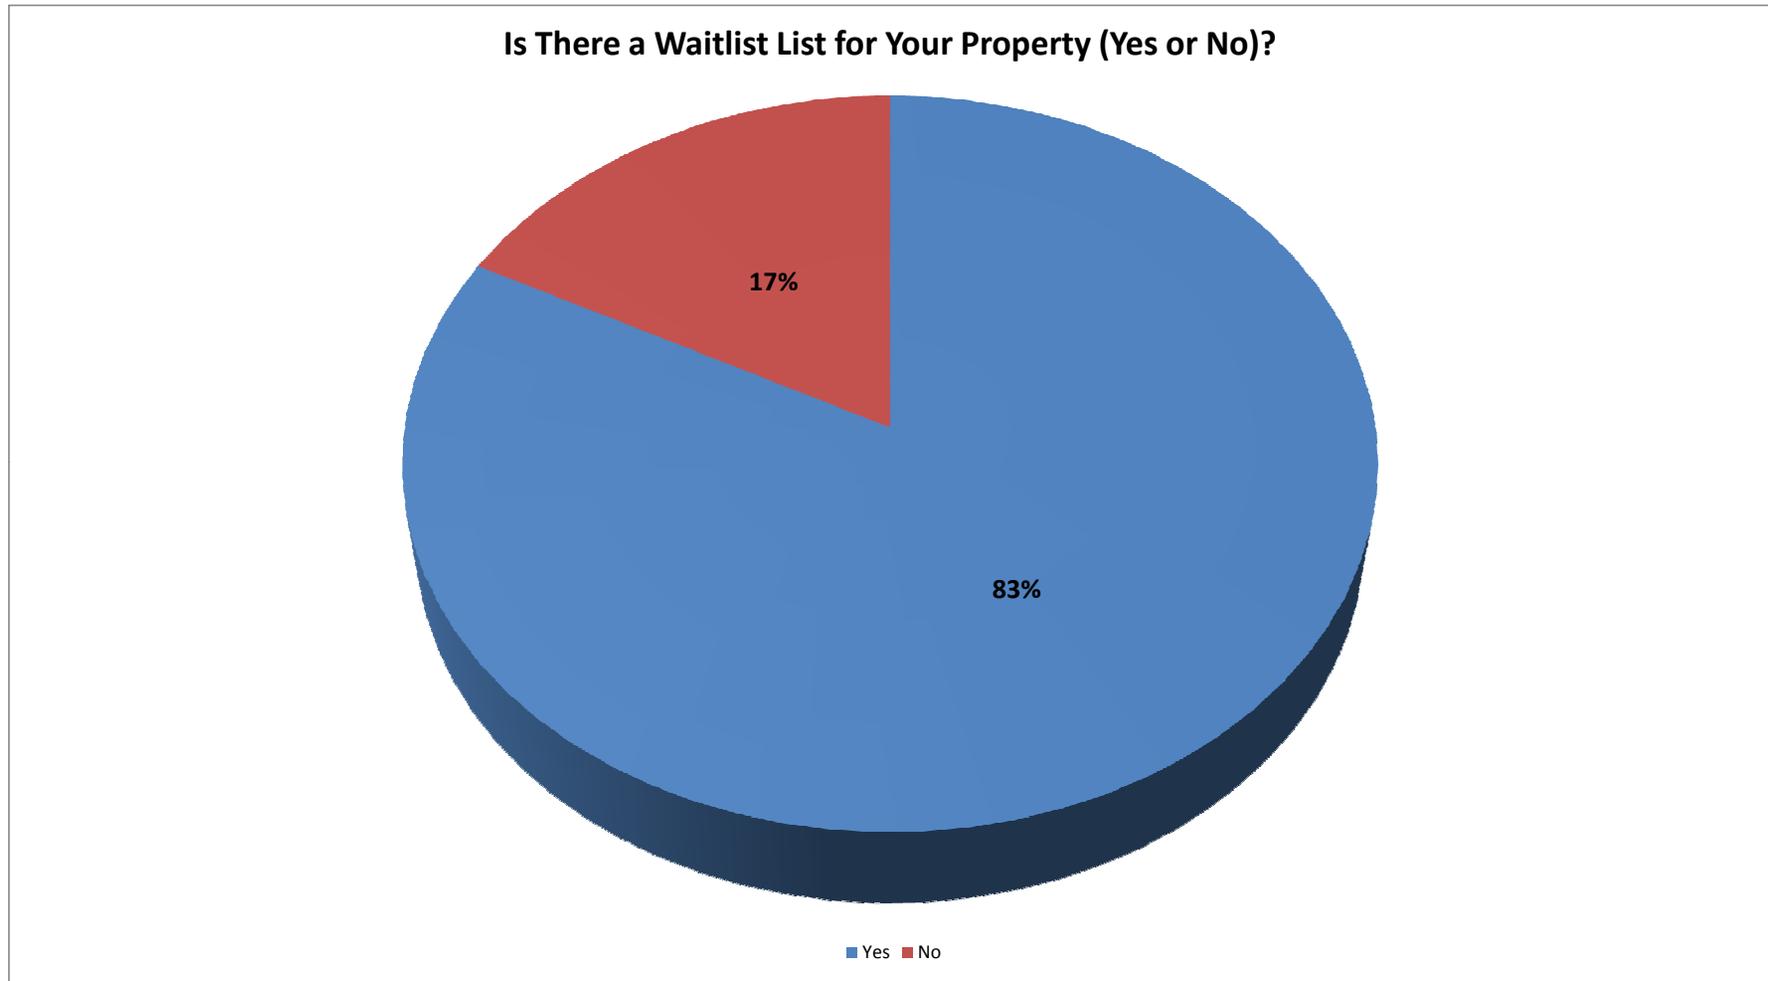

All information and data was obtained by contacting 85 public housing agencies throughout the state, approximately 400 project-based contract owners and 200 various additional property owners that were listed on the affordable rental housing directory.
