

ANNUAL HOMELESS ASSESSMENT REPORT

Balance of State

2011-2012

EXECUTIVE SUMMARY/INTRODUCTION

Housing is a basic human need. On any given day, thousands of men, women, and children are homeless in Kentucky. Every year Kentucky Housing Corporation (KHC), as the lead agency for the Balance of State (BOS) Continuum of Care (CoC), submits the Annual Homeless Assessment Report (AHAR) for use by the Department of Housing and Urban Development (HUD) and the U.S. Congress.

Kentucky has three CoCs: BOS CoC (including 118 counties), the Lexington/Fayette County CoC, and the Louisville/Jefferson County CoC. Each CoC is responsible for submission of their AHAR. HUD and Congress use this report for analysis of future funding and evaluation of homeless trends. The BOS CoC AHAR is combined with all other nationwide AHARs for national analysis of estimated homelessness, demographic characteristics of homeless person, service patterns, and capacity/utilization rates.

On a local level, this report is meant to be a resource for stakeholders in each community to strategically evaluate their funding needs and the trends of homelessness in their area. KHC will publish the AHAR every year in conjunction with other reports to better inform stakeholders of the progress being made to end homelessness in Kentucky.

This report is based on data shared by community partners through the Kentucky Homeless Management Information System (KYHMIS) database for the reporting year October 1, 2011, through September 31, 2012.

Data is reported in six categories: Persons in Families in Emergency Shelter, Individuals in Emergency Shelter, Persons in Families in Transitional Housing, Individuals in Transitional Housing, Persons in Families in Permanent Supportive Housing, and Individuals in Permanent Supportive Housing. All client information is unduplicated for the purposes of this report. Victim Service Providers (VSPs) are not included in this report nor are they included in the extrapolated estimates of homelessness based on Section 106 of The Violence Against Women Act. Victim Service Providers are defined as an agency whose primary mission is to provide services to victims of domestic violence, dating violence, sexual assault, stalking, or other dangerous or life-threatening conditions that relate to violence against the individual or a family member.

The BOS CoC must meet HUD reporting standards in order to be included in the national AHAR. Emergency shelter, transitional housing, and permanent supportive housing programs must show a greater than 50 percent KYHMIS bed-coverage rate. KYHMIS covers 68 percent of emergency shelter beds, 98 percent of transitional housing beds, and 80 percent of permanent supportive housing beds. Data quality must meet a standard of less than 10 percent overall missing data elements. The BOS CoC had 0 percent missing data in 24 elements and less than 10 percent in 19 elements. The BOS CoC recognizes that even though the overall 10 percent requirement was met, there were 3 data elements that were missing more than 10 percent in one category, permanent supportive housing families.

The report highlights the decrease in yearly homelessness from 9,471 in 2011 to 9,037 in 2012 (5 percent decrease). With the decrease in overall homeless, the occupancy rates of beds in shelters increased on average 5.5 percent. One reflection based on the data is that homeless persons occupy shelters longer due to the long wait for permanent housing. Shelters are able to utilize other programs like the Homelessness Prevention and Rapid Re-Housing Program to avoid families and individuals from becoming unsheltered homeless during this time of unstableness.

Overall, the BOS CoC reflects positive changes in the 2012 report. This report will become a baseline for homeless trends in the future. Each year will be comparative, as we become more intent on learning from empirical data shared with us by our partners in order to tell the true story of homelessness in Kentucky.

*Families are defined as any household that includes at least one adult over the age of 18 and at least one child under the age of 18. All other persons, including those in multi-person households consisting of only adults or only children, are reported in the individual category.

**The total homeless estimates are "extrapolated counts" based on the assumption that beds in programs that do not participate in KYHMIS are occupied at the same rate and with the same amount of overlap as beds located in KYHMIS participating programs.

2	Number of emergency, year-round equivalent beds in HMIS (i.e., bed capacity for participating providers)	SuperNOFA Housing Inventory Chart	212	335	581	393	129	439	Beds
3	Average number of clients served per bed	Step 1 ÷ Step 2	8.05	1.90	1.46	8.59	4.60	1.26	Persons per Bed
4	Number of year-round equivalent beds for not participating in HMIS (i.e., bed capacity for non-participating providers)	SuperNOFA Housing Inventory Chart	76	12	218	250	3	66	Beds
5	Estimated unduplicated number of persons served by providers that do not participate in HMIS	Step 3 x Step 4	612	23	318	2,146	14	83	Persons
	Estimated number of persons served by participating and non-participating Providers. Note that this estimate double								

6	counts people who use participating and non-participating providers. This double count will be eliminated by the overlap adjustment below.	Step 1 + Step 5	2,318	659	1,165	5,520	608	638	Persons
7	Overlap factor is the square of [(Bed capacity for HMIS non-participating providers)/ (Bed capacity for HMIS participating providers)]	(Step 4 ÷ Step 2) x (Step 4 ÷ Step 2)	0.13	0.00	0.14	0.40	0.00	0.02	is overlap factor
8	Number of persons who used more than one HMIS participating provider in the category	HMIS data from providers that participate in HMIS	39	3	1	155	7	0	Persons
9	Estimated number of persons in families that used both participating and non-participating providers	Step 7 x Step 8	5	0	0	63	0	0	is overlap (cross-over) adjustment
10	Total estimate of number persons that used either HMIS participating or non-participating Emergency Shelter	Step 6 – Step 9	2,313	659	1,165	5,458	608	638	Persons

Step	Description	Source	Persons in Families in Emergency Shelters	Persons in Families in Transitional Housing	Persons in Families in Permanent Supportive Housing	Individuals in Emergency Shelters	Individuals in Transitional Housing	Individuals in Permanent Supportive Housing	
11	Extrapolation Factor for non-participating providers: This is the factor applied to calculations that are based only on participating providers. It is used to estimate total number of persons served by participating and non-participating providers.	Step 10 ÷ Step 1	1.3556	1.0358	1.3750	1.6175	1.0232	1.1503	is the extrapolation factor for non-participating providers.
12	HMIS bed coverage rate	Step 2 ÷ (Step 2 + Step 4)	74%	97%	73%	61%	98%	87%	% of beds participating in the HMIS
13	Point-In-Time Extrapolation Factor. This is the factor applied to calculations that are based only on participating providers. It is used to estimate total number of persons served by participating and non-participating providers for values that report Point-in-time numbers. In contrast to the standard “Extrapolation Factor,” the point-in-time Extrapolation fact does not include an adjustment for	Step 6 ÷ Step 1	1.3585	1.0358	1.3752	1.6361	1.0233	1.1503	is the extrapolation factor for point-in-time counts.

persons using
multiple
providers.

¹ This reports provides estimates of the homeless individuals and persons in families in Emergency Shelter and transitional housing programs that participate in HMIS, as well as those that do not participate in HMIS. The estimate is an “extrapolated count” and is based on the assumption that beds located in programs that do not participate in HMIS are occupied at the same rate as beds located in HMIS-participating programs. The complete derivation of the total extrapolation factors is detailed in the next table.

Adding values across categories will double count persons who appeared in multiple types of programs.

The estimates do not include persons that are served by "victim service providers," including rape crisis centers, battered women's shelters, domestic violence transitional housing programs, and other programs whose primary mission is to provide services to victims of domestic violence, dating violence, sexual assault, or stalking.

² These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2.)

³ These values are generated by multiplying the HMIS data by the Point-In-Time Extrapolation Factor (Step 13, in table 2.)

⁴ These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2.)

⁵ These values are generated by multiplying the HMIS data by the Point-In-Time Extrapolation Factor (Step 13, in table 2.)

⁶ These results are generated by dividing the HMIS data on persons on an average night by the total beds in HMIS.

⁷ These results represent the average number of people who use each bed. It is generated by dividing the unduplicated count of persons recorded in HMIS, by the total number of beds in HMIS

⁸ These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2).

* This value is generated by multiplying the sum of the extrpolated number of persons in each category by an overlap factor, which accounts for persons who use multiple categories. This value is based on the overlap rates among participating programs and adjusted to account for possible overlap in non-participating providers. In this site the adjustment factor is: For the PIT. These values are generated by adding the point in time counts across categories. It is assumed that persons do not appear in multiple programs on the same night.
